

Home Automation Mobile Application

Worldwide leader in universal control and sensing technologies wanted a user-friendly mobile application to manage and secure home, with associated cloud and ultra low cost IoT Home Gateway.

Project Size: 4 members

Project Duration: 9 months

Technology Used: iOS/Android

Challenge

- Create a user friendly mobile application to control the ultra low cost IoT Home Gateway from anywhere. Careful optimization of the number of API calls to optimize cloud cost.

Outcome

- Simple and reliable Mobile application to manage and secure home against fire, flood and freeze
- Supports multiple devices and multiple operating systems
- Emergency situations can be notified to friends and family
