# WEB APP DEVELOPMENT IN LINUX / ELASTIX

Version 01

# Web App Development in Linux / Elastix

The Customer was looking for developing configuration and management support using a Web Interface for Network features on its Linux based Unified Communications Server.

## The Solution

- Developed, tested, and deployed following Network security, Gateway and Routing features:
  - Adding multi-interface support for DHCP server
  - DNS server
  - Dynamic DNS
  - Openvpn
  - PPTP VPN
  - VLAN support
  - Wireless AP support
  - Quality of Service
  - Static and Policy based routing
  - Extending firewall functionality
- GUI based configuration support for all the above features
- Added Zero configuration support

## Results / Outcomes

- Successfully delivered a fully functional configuration and management Web Interface for Network features on Linux based Unified Communications Server (Elastix 2.3)
